Skills

Proficient in generating test scenarios, writing test cases and defect reporting.

●●●●●

Advanced

Understanding of software testing methodologies and frameworks such as black-box testing, white-box testing, functional testing, non-functional testing and agile testing methodologies

Test Case and Bug Report of Challenge Institution

I have chosen Challenge Institution's website for my manual project as part of my training in Luminar Technolab. I have created the test case and bug report documentation for the website and I attached it to my Google Drive. I have attached the link for the document.

https://docs.google.com/spreadsheets/d/1NPhiFLVG67K1tRLzcBf3A2RRI_CW8VOI/edit?usp=drive_link&oid=104900830424311197971&rtpof=true&sd=true

●●●●●
Advanced

Strong understanding of all phases of Software Development Life Cycle (SDLC) and SDLC Models

●●●●●
Advanced
